

Name:

- Curious Ted

Description:

- The Curious Gadget-Loving Pre-Schooler

Backstory:

- Ted is a 3-year-old who is fascinated with robots, talking ones in particular. His parents are always interested in introducing tactile and educational toys that introduce STEM concepts.

Resources:

- Due to his parents having a disposable income to feed his curiosity, Ted has a variety of STEM-focused toys, and has access to a small library with science-themed picture toys.

Emotions:

- Ted has a big enjoyment and thrill interacting with technology that responds back and talks with him.

Goals:

- Ted wants to learn how a talking robot works and if he can teach it new things.

Scenario:

- Within this case, *Large Language Models for Babies* would include a narrative that allows Ted to understand and interact with interactive pages that have a storytelling aspect that teaches language acquisition or understanding in machines.
